

## Haymanot Wolde

### Full Stack Web Developer

**Cell Phone:** (+1) 614-927-9499 | **Email:** haymanotalemu21@gmail.com | Cleveland, OH 44124

**LinkedIn:** <https://www.linkedin.com/in/haymanot-wolde-4ab3771a9/>

**GitHub:** <https://github.com/haymanotyealemu> | **Portfolio:** <https://haymanotyealemu.github.io>

---

### Summary

- Skilled in building intuitive user interfaces using the current best web development practice.
- Have a good understanding of the full software development life cycle (SDLC) including planning, design, build, test, deploy, maintain.
- Graduated from a 24-week intensive web development training at **Case Western Reserve University**-Boot Camp program.
- Have strong analytical, web content management, collaborative, and fast learning skills.

### Technical Skills

- JavaScript | React.js | Node.js
- Express.js | HTML5 | CSS
- BootStrap | jQuery | Handlebars
- MySQL | MongoDB

### Projects

**Speech-Text:** <https://github.com/haymanotyealemu/CWRUBC-Project01.git> | <https://johannsp.github.io/CWRUBC-Project01/>

- A user can use the microphone to record speech in English, which will be transcribed and translated into German.
- Microsoft Speech Recognition and Microsoft Translator v3.00 are used to accomplish these tasks.
- **Core responsibility:** Developing the front-end or UX of the page and searching and getting the necessary third-party server-side API keys to fetch the relevant object data.
- **Tools / languages used:** JavaScript; HTML5; BULMA CSS framework; JQuery; Moment.js; Microsoft Speech Recognition and Microsoft Translator v3.00.

**Weather-Dashboard:** <https://github.com/haymanotyealemu/Weather-Dashboard.git> | <https://haymanotyealemu.github.io/Weather-Dashboard/>

- An application used to display weather data for the current day and 5 days forecast of a given city by a user.
- **Core responsibility:** Developing the application based on the user story criteria.
- **Tools / languages used:** JavaScript; HTML5; Bootstrap CSS framework; jQuery; the third party server side API (open weather map).

**Burger:** <https://github.com/haymanotyealemu/Burger.git> | <https://young-retreat-31053.herokuapp.com/>

- An application that allows the user to save burger name data, update the state of the burger, and stores the data in the MySQL database persistently.
- **Core responsibility:** setting up the MySQL database, building the express server and routes, writing client-side codes, and building handlebar templates.
- **Tools/languages used:** Adopting the MVC pattern design through using Node.js, Express, MySQL, Vanilla JavaScript, Handlebars, and Bootstrap.

**Ask-Away:** <https://github.com/haymanotyealemu/Ask-Away.git> | <https://whispering-depths-80857.herokuapp.com/>

- This is a kind of social media application like "Quora" which is implemented using the MERN full-stack approach.
- **Core responsibility:** Developing the back-end codes, defining the schema, building the entire express server, and handling the user authentication process.
- **Tools/languages used:** JavaScript; MongoDB; Redux; Express and Node.js, JSON-Web-Token Authentication, and Express-Validators.

## **Professional Work Experience**

Tamsel Design and Supervision Engineering PLC  
Construction Project Supervisor

Addis Ababa, Ethiopia  
October 2015 – January 2018

### **Responsibilities:**

- Provided technical support for the engineering and procurement team during contract negotiations and engineering stages for all construction packages with vendors.
- Developed detailed designs and drafting according to specifications ensured compliance with all project QA procedures and requirements.
- Prepared construction and environmental compliance documents, developing grading plans, cost estimates, and bid specifications.
- Participated in site safety audits regarding work execution, permits, worksite standards, and workforce knowledge of the work.
- Ensured the safe, cost-effective, and timely completion of all construction projects to meet or exceed clients' expectations.

## **Education and Certifications**

**Full Stack Web Developer Certificate:** Case Western Reserve University, Cleveland, OH

- A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS, JavaScript, jQuery, Bootstrap, Node Js, Web- APIs, MySQL, MongoDB, Express.js, & React.js.

**BSc Degree in Construction Technology and Management:** Addis Ababa University, Ethiopia

- A five-year undergraduate program from October 2009 to July 2014
